

CUTTING TOOL STEAM CLEANER

When dimensional precision of the cutting tool is of the utmost importance, the tool cleanliness must be taken into consideration. A single spec of dirt, dust, debris can produce false measurements and potentially create unnecessary adjustments at the machine.

The TC-BOSS Cutting Tool Steam Cleaner Unit is specifically designed for the cutting tool industry. It effectively eliminates contaminants such as coolant residue, oils, dust, dirt, fingerprints, etc. without leaving a residue that can compromise accurate tool inspection.

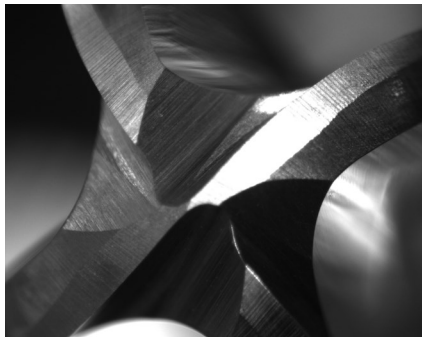

The reason for "Steam" : Steam efficiently removes contaminants without leaving any oily or watery residue, is completely natural and chemical free, is readily available and has a remarkably quick dry time. Thus optimizing tool cleanliness with measurement accuracy.

The TC-BOSS unit includes a removable polished steel side tray with a Delrin insert. The Delrin insert has a set of pre-machined holes encompassing a wide range of standard size tool diameters; which allows the tool(s) to be in an upright position during cleaning. The insert also includes "radius grooves" which allows for laying the tool down flat.

The TC-BOSS Cutting Tool Steam Cleaner Unit is the only device needed to achieve a truly clean, debris free cutting tool.

TC-BOSS Cutting Tool Steam Cleaner

Side Tray & Delrin Insert

- Can be a stand-alone-unit or it can be physically attached to either side of the Steam Cleaner.
- Delrin insert comes standard with multiple locations of 5 different pre-machined hole sizes to accommodate a variety of tool shank diameters (\emptyset .125", .250", .500", .750" and 1.00").
- 4X 1" wide x 3.75" long x 1/2" radius grooves allow to lay the tools down flat if desired.
- Delrin insert is raised off the tray and has strategically placed thru holes for drainage.

SPECIFICATIONS

- Overall Machine Dimensions: 216mm (8.5") wide x 216mm (8.5") high x 280mm (11") long
- Heating Power: 1000W, 15 AMP, 110 V, 50/60 Hz
- Weight: 13.6kg (30 lb)
- Pressure: 5 BAR (75 PSI)
- Water Reservoir: 1 Liter (1.06 QT)

ITEM	DESCRIPTION	PRICE (USD)
Tool Boss 1.0L	Cutting Tool Steam Cleaning Unit includes removable side tray* ¹ with Delrin insert, 3' flexible hose, 3" steam dispensing handle with fingertip control, external pressure gage, indicator lights for both water level & steam pressure, copper tubing and brass fittings, a single boiler with heating element., polished steel enclosure with ergonomically handle for carrying and 1 year warranty on all parts and labor. * ¹ Side Tray can either be a stand alone unit or physically attached to either side of the steam clean unit.	\$1,199.00
